The Preparation and Care of a Lawn

A well cared for lawn adds more than any other one thing to the attractiveness of the home grounds, and not only this, but it increases the value of property by much more than the mere expense of securing the lawn. There are a few simple rules which, if followed consistently, will be certain to bring good results.

The ground must first be thoroughly prepared by draining, if necessary, and spade or plow to the depth of 6 to 12 inches, according to the nature of the soil, applying a liberal quantity of well decomposed manure, bone meal or pulverized sheep manure, the latter we recommend as being lasting in effect, not liable to burn the grass and free from weeds. Clean the ground

thoroughly and rake perfectly smooth and level, as much of the success depends upon this part of the preparation. The seed should be sown on a calm day, that it may be applied evenly and at the rate of sixty-four pounds per acre, or one pound is sufficient for 600 square feet. After the seed is sown the ground should be rolled with a light roller or evenly tamped with the back of a spade. The plot should be mowed every ten days from May until September, using a sharp scythe in preference to a mower until a close turf is formed. Frequent mowing and rolling is necessary to maintain a close even turf. April and September are the best months for sowing lawn seed.

Park Lawn Grass Mixture

In our lawn mixture we use only the highest quality, extra clean seed, and free from weed seeds which abound in inferior grades. We use only the choicest low growing grasses, and a lawn produced from our seeds will maintain a rich, dark velvety appearance and a permanent sod. One pound will sow 600 square feet. $\frac{1}{2}$ lb., 25c; 1 lb., 40c; 2 lbs., 75c; 4 lbs., \$1.25; 100 lbs., \$30.00.

Shady Nook Grass Mixture

A special mixture of grasses adapted to growing under trees and in shady places, where it is quite difficult to produce a satisfactory growth. 1 quart, 35c; $\frac{1}{2}$ pk., \$1.25; 1 peck, \$2.00.

FOR LAWN DRESSING USE

Pulverized Sheep Manure

A well kept vegetable garden is an attractive feature of the home grounds.

Foreword

IMPROVED SERVICE. Since the issue of our last catalogue, we have greatly improved our facilities for serving our trade by installing a new and strictly up-to-date set of fixtures giving far more capacity for stock packed ready for delivery, and the new arrangement allows far greater floor space for the convenience of customers. While the past season we were enabled to give better service than most houses in the Seed Trade, we were not satisfied with our efforts, and we were prompted to try and serve our customers far better than ever in the past.

EARLY ORDERS. We believe there has never existed such a scarcity of Vegetable Seed as confronts the Seed Trade the coming season. Foreign supplies are virtually cut off, and many of our home crops have suffered extremely from unfavorable weather throughout the entire season. We are making every effort to make our stock complete as possible, but it will be necessary to make your orders earlier than usual this season, as many varieties will be entirely sold out, and unobtainable after the season opens up.

SELECTION OF STOCK. We have for years secured our stock from growers of the highest standard, and make every effort to secure the best the market affords, selecting from year to year the best varieties of the several classes keeping our list confined to approved standard sorts.

LOCATION OF STORE. My store will be found on the northwest corner of Washington and Eddy streets, one block from Dorrance or Westminster streets, and within a short distance of the Union Railroad Station.

SEEDS BY MAIL. For the benefit of out-of-town buyers, I pay postage on all seeds ordered in packets, ounces and one-fourth pounds. Add for prepayment of postage on large quantities at parcel post rates, according to zone. Allow two pounds per quart for Peas, Beans and Corn.

PARCEL POST RATES. 1st and 2nd zones, within 150 miles, first pound 5c., additional pounds 1c. each. 3rd Zone, 150 to 300 miles, first pound 6c., additional pounds, 2c. 4th Zone, 300 to 600 miles, first pound, 7c., additional pounds 4c. each.

PACKING AND DELIVERY. I make no charge for boxes and packing and deliver all goods free within the city limits. Seamless are charged thirty cents and small cloth bags ten cents each.

While great care is exercised to have all seeds pure and reliable, I do not give any warranty, expressed or implied. If the purchaser does not accept the seeds on these terms and conditions they must be returned at once, and the money that has been paid for the same will be refunded.

Endive Broad Leaved

Lettuce Wayahead

Leek

One ounce will sow 100 feet of drill.

The Leek is very hardy and easily cultivated. Sow in April in drills one foot apart, and transplant in July into rows fifteen inches apart, and six inches apart in the rows. The soil should be rich but not fresh manured. The Leek is a member of the onion family, and the method of cultivation is like the onion except that it should be grown deeper in the ground.

Large American Flag. The kind mostly grown for market. Pkt., 10c; oz., 40c; $\frac{1}{4}$ lb., \$1.35.

Musselburgh. Grows to very large size. Pkt. 10c; oz., 40c; $\frac{1}{4}$ lb., \$1.35.

Mustard

One ounce to 80 feet of drill.

Sow in shallow drills a foot apart, covering the seeds about a half inch deep. For succession sow every few weeks. The young leaves are used for salads or are cut and boiled like spinach, and the seeds are used for flavoring.

White. Best for salads. Pkt., 5c; oz., 20c; $\frac{1}{4}$ lb., 50c; lb., \$1.50.

Brown. More pungent in flavor than the White. Pkt., 5c; oz., 20c; $\frac{1}{4}$ lb., 50c; lb., \$1.50.

Muskmelon Emerald Gem

Mushrooms

"American Pure Culture Spawn," produced under the new selective method, recently discovered, the only method which makes possible the segregation of varieties is received absolutely fresh at frequent intervals from the manufacturer. This spawn will produce mushrooms of a specific variety selected with special reference to their size, color and prolificness, to the exclusion of other and inferior fungi. It absolutely eliminates all danger of raising poisonous mushrooms. We keep on hand the cream white variety. Bricks weigh from $1\frac{1}{4}$ to 1 1-3 lbs., and will spawn 10 square feet of beds. **1 Brick, 30c; 10 Bricks, \$2.50; 100 Bricks, \$20.00.**

Illustrated book, "Mushroom Culture and Pure Culture Spawn," containing the latest methods of raising, preserving and cooking mushrooms, **25c per copy, post-paid.**

Leek Musselburgh

Muskmelon

One ounce to 80 hills; 2 to 3 pounds per acre.

Prepare hills four to five feet apart each way; mix well with the soil in each hill a couple of shovelfuls of thoroughly rotted manure. When the weather has become warm plant from 12 to 15 seeds in each hill; afterwards thin out, leaving four good plants.

Emerald Gem. Early. Small, flesh deep orange; very sweet. The best and most popular sort for this section. Pkt., 10c; oz., 25c; $\frac{1}{4}$ lb., 75c.

Extra Early Hackensack. Earlier than Hackensack and not quite as large. Pkt., 10c; oz., 25c; $\frac{1}{4}$ lb., 75c.

Tip Top. Medium size, round, yellow flesh. Pkt. 10c; oz., 30c; $\frac{1}{4}$ lb., \$1.00.

Sweet Peas

During the last ten years great improvement has been made in size and beauty of this popular flower and the development is still in progress. New colors, form and types are being brought out by the Sweet Pea Growers every year, but we will confine our list here to the best tried sorts, and we feel confident that we can take care of the wants of our customers with the stock we carry.

The proper time to spade garden for Sweet Peas is in the fall, as the longer the soil remains in the rough state the better. Give a liberal dressing of well rotted stable manure, ground bone and a dusting of lime. Spade to a depth of six or eight inches and allow soil to remain in the rough without chopping down. When sowing seed see that the soil is firmly tread down, as Sweet Peas require not only a deep soil but a firm one. Seed should always be sown early in spring one inch deep and when plants are well up thin to two to four inches apart. Many thin to six to nine inches apart and when three or four inches high pinch out tops to start branching. Support should be given early before plants get twisted. When hot, dry weather begins, see that the plants are well mulched and well watered. Look out for green aphid and keep clean by spraying with solution of tobacco extract. Care must be taken to keep flowers picked, as the forming of seed pods will stop blooming.

In giving a list of the Sweet Peas we have confined ourselves to those sorts that have been tested as the strongest growers, and from the various shades and colors have selected those which are the clearest and the truest.

Giant Spencer—Waved Varieties

Spencer Sweet Peas are the largest and most beautiful of all known Sweet Peas, the individual flowers measuring frequently 2 to 2½ inches across; they are also remarkable for their profuseness and continuous bloom. On strong stems 9 to 12 inches long, the beautiful flowers are borne three to four on a stem. The standards are open, well rounded and exquisitely waved and often serrated.

Summer Flowering Bulbs

Begonias

Tuberous Rooted

Begonias are indispensable for shady places in the garden or lawn, also desirable for pots or piazza boxes. Start in the house in March or April and remove to the open ground as soon as danger of frost is past. They will bloom freely from July until cut down by the frost. Dry tubers may also be planted in the open ground in May. Care should be taken to keep constantly moist.

Single. White, yellow, rose, scarlet, crimson, orange. **Price, extra fine bulbs, 10c. each; \$1.00 per doz.**

Double. White, yellow, rose, scarlet, crimson, orange. **Price, extra fine bulbs, 15c each, \$1.75 per doz.**

Gloxinias

Should be grown in pots in the house or on the veranda, in boxes or little frames outside, and will flower all summer. Their green leaves are surmounted with a cluster of lovely trumpet shaped flowers. The coloring is exquisite; the ground-work of many is pure white, with throats of blue, scarlet, rose or crimson; or the tubes are of bright colors with white throat. The bulbs should be started in a warm place—greenhouse, hot bed or sunny window. Early in the fall they should be dried off, letting the leaves die; pots can be kept over winter in a cellar free from frost. **Extra strong bulbs, named varieties, 20c each; \$2.00 doz.**

Gladiolus

Bulbs planted in open ground in spring produce plants with long, rush-like foliage and magnificent flower spike early in the following autumn.

Healthy birds and lots of eggs, the two big things in poultry raising, are made certain by giving

Pratt's Poultry Regulator

100 lb. bags, \$9.00; 25 lb. pail, \$2.50; 12 lb. pail, \$1.25; packages, 50c and 25c. It builds up vitality, insures sound digestion, sharpens appetite and prevents disease, thus putting birds in condition for heavy egg laying or winning blue ribbons. Pratt's is the original Poultry Regulator of America and is in

use by the most successful poultry raisers everywhere. When regularly used, hens lay throughout the year. It will prevent chicken cholera, gapes, roup, rheumatism, expel worms, prevent leg weakness and egg eating. It will greatly improve turkeys, geese, ducks, pigeons and guineas insuring quick growth and keep them free from disease.

Get rid of lice on your poultry, in nests, dust baths, incubators and elsewhere in a day's time by using

Pratt's Powdered Lice Killer

50c and 25c

Effective, non-poisonous, non-irritating. May be used wherever a powder is suitable. A splendid deodorizer.

It quickly and thoroughly kills all lice on little chicks, big chicks, setting hens and incubator chicks. It rids horses, cattle, hogs, dogs and cats of lice, and destroys ticks on sheep. It destroys insects and bugs on vines, plants and flowers. A valuable deodorizer and disinfectant for all poultry houses, barns, stables and dwellings. Drives out moths from closets, furniture, carpet and clothing.

When baby chicks come, keep them healthy and growing and bring even the weak ones along by feeding

Townsend's Horse Lawn Mowers

Triple rolls with triple pawls in each roll, making the most powerful and instantaneous driving mechanism ever put in a lawn mower. This feature maintains the motion of the blades even in turning sharp corners, and forms a strong contrast with other double roll mowers whose knives have no motion when turning corners. It is made very strong and powerful, of the very best materials, and finished in the most perfect manner.

It will cut over very rough and uneven ground and stand very rough usage, and still will get down into the turf and cut its swath clean, easily and smoothly. It is, on this account, very popular with golf clubs. We warrant it superior to any mower ever built, and will refund the purchase price to any customer dissatisfied after a trial.

Furnished with seat, handles and shaft complete, and made 30-inch or 35-inch width of cut. Prices on application.

Our Annual Bulb Catalog will be issued September 1.

The Links Lawn Boot

For Use on Golf Links. Tennis Courts and Fine Lawns.

Aside from the lasting qualities it is the only humane boot, for the reason that it is firmly fastened to the hoof instead of around the ankle, thus giving free action to horse's feet and obviating all possibility of chafing. Price, set of four, \$10.00.

Coldwell's Horse Lawn Mower

Coldwell's Improved Horse Mowers are fitted up throughout with the best steel shafting, composition bushings or bearings, polished oak foot-boards, etc.

Unquestionably the best Horse Lawn Mower manufactured, and guaranteed to give entire satisfaction.

Furnished with side draft attachment which keeps the horse on the cut grass only. Prices upon application.

"Lion" Ball Bearing Lawn Mower

The ball bearing in lawn mowers is the latest and probably the greatest improvement in their manufacture. The "Lion" is constructed with 10-inch skeleton rim driving wheels, 6¼ inch cutting cylinder with five knives. Is a strong and powerful, easy running mower.

For those who mow their lawns frequently we advise the use of fine blade machines, as they leave the lawn in a very smooth condition.

16-inch, \$11.50

18-inch, \$12.50

20-inch, \$13.50

Roller Lawn and Golf Mowers

On lawns where exceptionally fine cutting is a necessity, there are no mowers equal to these. They cut smoothly, effectually doing away with that wavy appearance so often seen on a freshly cut lawn. They will also roll down a new lawn and protect it against upheavals caused by dampness, ants and other insects. These are the only mowers that will cut borders properly and without danger of cutting the sod.

Price, 18-inch, 6 blades, \$17.00.

Derby Lawn Mower

A Superior Medium Priced Machine

This mower is built to accommodate those who have only limited city lots to mow. And while of lighter construction than our "Lion," in quality of materials we consider it equal.

14-inch, \$7.00; 16-inch, \$8.00; 18-inch, \$9.00.

Gleaner Lawn Trimmer

Adapted to trimming edges of walks, drives, beds, etc., which cannot be reached with the regular mower, and have required tedious hand labor.

8-inch cut, \$6.00.

"Iron Age" Combined Seed Drill and Double Wheel Hoe

The Seed Drill is complete in itself, merely requiring to be bolted with two bolts to the wheel frame. As a drill it opens the furrow, drops the seed, covers and rolls it and marks the next row at one passage. It can be set to sow shallow or deep, thick or thin, as the flow of seed can be instantly shut off to turn rows. The agitator is a revolving brush which will not injure seed in the slightest.

301 Double and Single Wheel Hoe, complete without rakes, \$11.00.

301R Above with Rakes, \$12.00.

313 Above, Side Hose and Teeth only, \$9.50.

303 Above, side Hoes only, less Vine Lifters, \$7.75.

304 Combined Double and Single Wheel Hoe and Drill Seeder (no Rakes), \$18.00.

306 Combined Double and Single Wheel Hoe, Hill and Drill Seeder (no Rakes), \$19.00.

308 Hill and Drill Seeder (new), \$18.00.

320R Single Wheel Hoe complete with Rakes, \$9.00.

320 Above, without Rakes, \$8.00.

321 Above, Side Hoes only, less Vine Lifters, \$6.25.

The "Gem of the Garden" Wheel Hoe

Single Wheel Hoe.

No greater proof can be given of the popularity of a tool, or its intrinsic worth, than the one simple fact of a continued demand for it. In the past few years there have been placed about **fifteen thousand** of the "Gem" Wheel Hoes in the hands of gardeners, and we are not aware of a single instance in which it has failed to give entire satisfaction to the user. It is not a toy, neither is it a tool made of light gray castings, calling for constant repair, the "Gem" being largely made up of **steel** and **malleable iron**. The set of slender, stirring teeth, each stamped from one piece of steel, cannot be excelled for thorough work, especially in hard soil. **Price, complete, \$8.00. With teeth only, \$6.50.**

Inoculate Your Garden Beans, Peas, Sweet Peas, Alfalfa, Clovers, and all other legume crops with

Mulford Cultures

FOR LEGUMES

Uninoculated ALFALFA Inoculated
Photographed on same scale. Plant on left not inoculated—Plant on right inoculated with **Mulford Culture for Alfalfa**. All other conditions identical.

Mulford Cultures contain pure, tested strains of active, vigorous nitrogen-fixing bacteria, for inoculating seeds of legumes or soil.

Legumes offer the best-known means of maintaining soil fertility and rejuvenating over-cropped and wornout fields. They add both humus and nitrogen to your soil and thus increase your yield of wheat and other non-legume crops.

The U. S. Department of Agriculture and many State Agricultural Experiment Stations recommend inoculation of legumes with nitrogen-fixing bacteria to induce a prompt "catch" and increase your yield.

Mulford Cultures are prepared for

Alfalfa	Alsike Clover	Vetch	Lima Beans
(Lucerne)	Burr Clover	Velvet Beans	Lespedeza
Crimson Clover	Cow Peas	Sweet Peas	Beggar Weed
Sweet Clover	Soy Beans	Garden Peas	and Others
Red Clover	Peanuts	Garden Beans	

Always specify on your order what crop you want to inoculate, as there is a different strain of bacteria for each legume.
